CSA is a form of local agriculture designed to directly connect consumers to growers. Consumers (shareholders) commit to supporting farms and growers by sharing the costs of produce production, along with the accompanying risks (weather, pests, etc.) and rewards. Growers commit to providing shareholders with naturally grown produce throughout the CSA season. The result is a food supply grown sustainably, without the use of chemicals or pesticides.

I have read this membership agreement and understand the risks and rewards associated with growing produce in New England. I agree to share these risks and rewards with the CSA growers and proprietors, and would like to become a member of the Greater Newburyport CSA.
